

# air quality and climate change

From our non-statutory consultation, it is clear that air quality and climate change are of **high importance to local people** – as they are globally.

We have installed a **continuous air quality monitoring station**

at Thomas Clarkson Academy to establish baseline air quality.

We have considered **two aspects** relating to **climate change**:

**1**

The **effect our facility might have** in terms of reducing Greenhouse Gas emissions.

**2**

The **impact that climate change might have** on our facility in the future.

## Assessment

These have been assessed for the **construction, operation and decommissioning** phases of the development, as well as in relation to how they might affect the ability of the **UK Government** to meet its **carbon reduction targets**.
